Our Process and Philosophy

Project Management

- Experienced in eDiscovery Case Management and Operations
- Technical operations of processing data, preparing depositions and productions

Data Analytics

 Our team of data scientists have deep experience in data analytics, text mining, statistical engineering, and machine learning. Leveraging our data analytic services can help dramatically reduce the scope of eDiscovery costs and review time

Collections

• Leveraging the latest data collection methods, we are proficient in understanding all eDiscovery process and ensure all data that is relevant to the litigation is collected in a proper manner.

Processing

 Skilled and certified consultants in: Relativity, View Point, Concordance, iPro, Rational Revie, Omnix, & Encase.

Review

 We provide a blended onshore/offshore model for document review to help reduce project costs and provide better accuracy to the review process. Our review teams consist of attorneys (barred and nonbarred) and paralegals.
