

# CASE STUDY

Conway, Donovan, & Manley, PLLC,  
Partners with [s]Cube to manage sensitive,  
complex, multi-party litigation

*"Managing cases today requires alignment with strategic partners. With our partners at [s]Cube, we were able to achieve remarkable results in a sensitive, complex multi-party litigation. [s]Cube efficiently processed, filtered and structured a high volume of data in a hosted environment where our Partners and staff were able to search, review and share highly sensitive data. We are well positioned to manage future cases with our partners at [s]Cube."*  
— **Ryan E. Manley, Esq.**

## CLIENT BACKGROUND

LAWCDM.com

Conway, Donovan, & Manley, PLLC, is a New York based legal practice known for its expertise in handling high-stakes litigation cases. They were retained along with three other law firms to provide legal services in a class-action lawsuit. The case involved multiple parties, extensive volumes of data, and the need for the efficient and secure management of electronic data. To navigate the intricacies of this sensitive and challenging discovery, Conway, Donovan, & Manley, PLLC, turned to [s]Cube, Inc.

## The Challenges

### Massive Data Volume

The case involved a vast amount of electronic data, including emails, documents, as well as hand-written documents. The volume and variety of the data made it difficult to identify the relevant data efficiently.

### Data Security and Confidentiality Concerns

Given the sensitive nature of the case, data security and confidentiality were paramount. The law firm needed a robust solution to ensure the protection of client information and to comply with legal and regulatory requirements.

### Hosted Multi Party Document Review

The legal team needed an effective strategy to expedite the document review process without compromising accuracy. The document repository also needed to be shared by multiple parties with each having its own private and confidential workflows.

## Solution

Conway, Donovan, & Manley, PLLC, partnered with [s]Cube Electronic Discovery Services, a leading provider of cutting-edge eDiscovery solutions, to address the challenges of the multi-party litigation case.

### [s]Cube eDiscovery

### Robust Data Security

To safeguard sensitive client data throughout the litigation process, [s]Cube implemented stringent security measures. They employed state-of-the-art encryption protocols, access controls, and secure data practices to protect against unauthorized access or breaches all within the confines of the Amazon S3 cloud.

### Viewpoint Processing – Data Analytics & Review

Utilizing advanced eDiscovery technology, [s]Cube processed, indexed, and analysed large volumes of electronic data. In addition, [s]Cube quickly organized and structured the data in Viewpoint, enabling the efficient searching, filtering, and retrieval of relevant information.

To expedite the document review process, [s]Cube implemented advanced machine learning algorithms and analytics. This technology streamlined the review and process of identifying relevant documents.

### Collaboration and Communication

In addition, [s]Cube provided a collaborative platform that enabled seamless communication and coordination between Conway, Donovan, & Manley, PLLC, the client, and other involved parties. The platform allowed secure document sharing and annotation, fostering efficient collaboration among team members.

## Results

By leveraging [s]Cube Electronic Discovery Services, Conway, Donovan, & Manley, PLLC, achieved remarkable results in managing the sensitive, complex multi-party litigation case. The success in this case has positioned the firm as trusted Counsel for similar matters where complex electronic discovery is a factor.

### Time and Cost Savings

[s]Cube's advanced eDiscovery technology and management reduced the time and effort required for data processing, analysis, and review.

### Improved Accuracy and Efficiency

The technical review platform hosted by [s]Cube ensured a more accurate identification of relevant documents, minimizing the risk of missing critical evidence. The streamlined process increased efficiency and allowed the legal team to focus on higher-value tasks.

### Effective Collaboration

The review platform facilitated seamless communication and enhanced collaboration among all parties involved, leading to better coordination, increased transparency, and improved decision making.

## Conclusion

Through the strategic partnership with [s]Cube Electronic Discovery Services, Conway, Donovan, & Manley, PLLC, successfully managed a sensitive, complex multi-party litigation case. Combined with its commitment to data security and deep experience, [s]Cube's advanced eDiscovery technology provided the law firm with a powerful solution to overcome the challenges associated with large-scale electronic evidence management. The positive outcomes achieved in this case study reinforced the reputation for excellence of Conway, Donovan, & Manley, PLLC, and continues to position them as trusted advisors for similar matters.
