

Innovative and Agile Software Engineering Solutions

WHO WE ARE

Headquartered in Schenectady, [s]Cube stands as a beacon of innovation in Information Technology. With a dedicated team of 50 full-time professionals, we pride ourselves on delivering top-tier IT services to a diverse clientele, for both private and public sector businesses as well as government entities.

A core strength lies in our software development capabilities. Our full-stack development team is well-versed in every aspect of the software engineering lifecycle. From product inception, through requirements gathering, to the finesse of design, implementation, and beyond to release and delivery, we ensure excellence at every stage.

OUR SERVICES

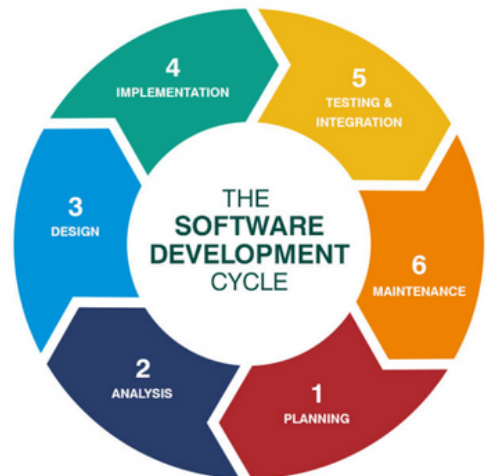

- **Full Software Lifecycle Management:** From product inception and requirements gathering to design, implementation, release, and delivery.
- **Diverse Technology Expertise:** Proficiency in a wide range of technologies, ensuring versatility in software development.
- **Agile and Incremental Delivery:** Adoption of modern Agile methodologies for efficient and incremental project delivery.

ADVANCED METHODOLOGIES

- **Continuous Integration & Continuous Deployment (CI/CD):** Automated build and deployment processes for rapid and reliable software delivery.
- **Cloud-Native Solutions:** Expertise in leveraging cloud environments, utilizing cloud-native technologies for optimal infrastructure management.

OUR COMMITMENT

- Dedicated to crafting high-quality software solutions that precisely meet your needs.
- Versatile expertise in managing projects of all scales, from intricate web applications to streamlined data interfaces.

Empowering the future of software engineering with innovation and enduring partnerships.

EXECUTIVE TEAM

Patrick Gray, Founder and President: Patrick leads the organization with a strong strategic vision, excelling in team management, inspiration, and problem-solving. A seasoned leader in start-ups, he possesses proven negotiating skills and expertise in strategic partnerships, capital raising, and product marketing. Mr. Gray, a founder of multiple start-ups and board member of publicly traded companies, contributes a dynamic entrepreneurial spirit to the team.

Haileab Samuel, Chief Executive Officer: Responsible for driving company strategy, innovation, and growth. Over 25 years of experience leading highly effective software implementation teams and projects in a variety of industry sectors. Strong technology executive with an extensive record of successful project delivery and successfully turning around troubled projects. Expert at implementing organizational policies and procedures that improve operational efficiency, client satisfaction, and service quality that helps [s]Cube deliver exceptional service to their customers.

Adam Bell, Chief Operations Officer: Responsible for all project delivery related services, and ultimately for driving client satisfaction. Over 30 years of experience in leadership roles with regional and global high-tech service providers servicing corporate and government customers. Expert at team-building, creating efficient and scalable processes, and developing data driven operational delivery methods which are cost effective, and which drive on-time/on-budget results for [s]Cube partners and clients.

Paul Ciullo, Chief Financial Officer: Responsible for all aspects of the company's financial reporting and financial management, working directly with operational leaders to drive sound business decisions grounded in solid economic measures and direction. Over 20 years of experience specializing in strategy development and financial performance, project management, and the formation and execution of contracts.

Alan Poirier, Chief Technology Officer: Responsible for all technologies to support internal and customer IT and Security teams. 20 years of implementing and supporting complex infrastructures and technical solutions to allow for optimum performance of systems and workflows. Acts as main liaison between operations and IT to identify and drive implementation of solutions to resolve issues surrounding complex deployments of internal and customer platforms.

Scott Mogavero, Chief Strategy Officer: Responsible for developing transformative client solutions that deliver lasting benefits. An accomplished executive with over 25 years of global leadership experience in large corporations with the ability to deliver results (cost, cycle) through all market lifecycles. A strong operational leader with the ability to drill deep where needed to root cause issues and understand the levers that will position clients and deliver expected results.

Stephen Graham, Chief Information Officer: Responsible for leading technology teams in designing and building enterprise software solutions. Major focus on operational efficiencies and scalable architecture. Over 15 years of experience implementing corporate software engineering initiatives from product inception through delivery. A strong technology leader responsible for talent acquisition, team organization, direction, and thought leadership.
